

Animal Testing Policy

Swanline Print Ltd has a clear and firm stance on the use of animal testing, which encompasses three main criteria. To the best of our knowledge:

- A) No packaging or POS displays manufactured/converted at Swanline contain animal derivatives.

- B) No Swanline Print products have ever been tested by us (or agencies acting on our behalf) on animals.

- C) No bought-in components or raw materials used in the conversion of Swanline product have been tested by us or our suppliers (or by agencies acting on their behalf) on animals.
